

## Customer-specific solutions

In direct cooperation with the customer and in a very short time, Beinlich develops and produces solutions which meet the demands and specific requirements of the application. Standard materials like steel or stainless steel can be used as well as special materials (e.g. titanium).

Additionally, the customer can also choose from different shaft seals, e.g. mechanical contact seal with block chamber or a leakagefree magnetic coupling, to achieve an optimum of efficiency.

More information on customer-specific solutions can be found in our product catalogues. We would be glad to advise you depending on your customised requirements.
