

SUCO Mechanical pressure switches hex 27

SUCO pressure switches hex 27 do have a changeover (SPDT) contact system which enables to adjust the set point as well as the hysteresis values. By choosing different versions, set points can be adjusted between 0,3- 200 bar. A patented system even allows the adjustment range of our 0183 range up to 600 bar. Our hex 27 range is also available up to 250 V.

More information on SUCO mechanical pressure switches 27 can be found in the product catalogue.
