

Customer-specific solutions

VSE supplies customer specific flow sensors of the highest quality and within shortest development times. We provide exceptional solutions tailored to the client's individual requirements in a wide range of materials, e.g. steel, stainless steel, titanium, aluminium as well as in bronze materials.

Performance data examples

- Temperatures up to 210°C
- Pressures up to 700 bar
- Weight improvement down to

Special materials

- e.g. titanium (other materials on request)

Application examples

- Hydraulics
- Offshore
- Technology
- Process automotive control
- Further examples on request
